SOS-PROJECT

DEAR FRIENDS

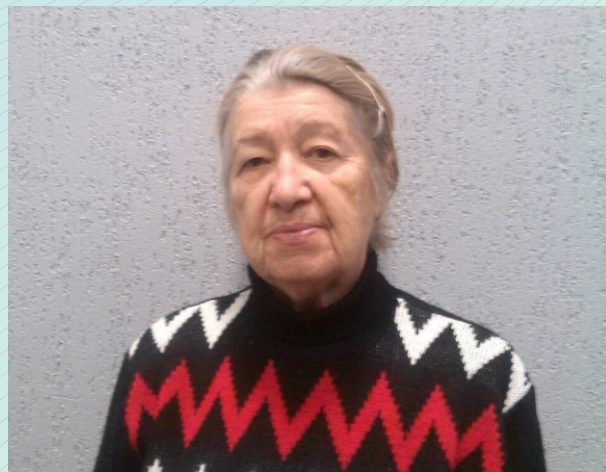

Under the SOS project we want to introduce you to 79-year-old Leonid and 82-year-old Emma who come from Vinnystia. Both of them need your help very much.

They are diagnosed with the same serious eye disease. The disease is characterized by some changes in the yellow spot in the retina. If the disease isn't properly treated, it may lead to the gradual sight loss.

The disease can be stopped by special injections which cost altogether 1000\$ for both Emma and Leonid.

Leonid and Emma need our support and help to save their eyesight that is essential for their normal life.
