SOS-Project

Within the SOS project that we have started we want to bring to your attention another urgent need – 43 year old Siergiej who has become seriously ill with intestinal cancer.

Siergiej is married and has two children. He can't afford any kind of treatment because of the small amount of income he receives from his work. For this reason, not only is he ill with cancer but has also become ill with asthma.

Siergiej's situation is very critical. He should begin chemotherapy treatments as soon as possible. The cost of this treatment is one thousand dollars. Because of Siergiej and his family's meager income this amount of money is impossible for them to attain. We will be grateful for any financial help that will help make it possible to save Siergiej's life so that he can continue to care for his family.

All contributions can be paid into our account with the designation "a donation for statutory purposes – help for Siergiej"
